Downloading Pervasive PSQL v11 and Patches

Last Updated: 03/21/2013

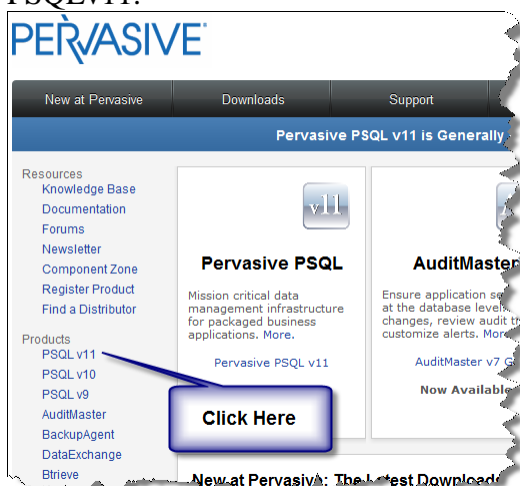

Pervasive's web site is not the most intuitive web site that has been created, so we have created these directions to help you download the proper files for your PSQLv11 environment. Please note that this is a paid upgrade from previous versions, so if you do not yet have a license for PSQLv11, please contact Goldstar Software for information on the pricing of this upgrade.

If you are installing a new engine, then you should install the SP3 release and the latest SP3 update. If you have an older engine (v11.21 or older), then you should also install the SP3 release and then the latest update. If you are already on SP3, then you can jump to the next section to download the latest Update Patch only.

Download the Latest SP3 Installation

You must FIRST download the Pervasive PSQL v11 SP3 installation.

1. Use your web browser to go to www.pervasedb.com and click on the link for PSQLv11.

2. In the next page, find the *PSQL v11 SP3 Downloads* section.

| Downloads | | | Version Data | | Documentation | |
|---|---------------|--------|--------------|---|---------------|----------------|
| Server | Win 32 and 64 | | Linux | Date | January 2013 | What's New |
| Client | Win 32 | Win 64 | Linux | Version | v11 SP3 | Readme for SP3 |
| Workgroup | Win 32 | | | Build Number | 11.30.026 | History |
| PSQL v11 SP3 includes a temporary license | | | | PSQL v11 SP3 can be installed over v11.0x, v11.1x or 11.2. Do not install over v11.3 RC. Do not install over PSQL Vx. | | Known Issues |

3. Now, download the appropriate version. If you have a Workgroup Engine, click to download the Workgroup (Win32). If you have a Server Engine, click on the "Win32 and Win64" link, and you will be able to install either.
4. If you see the Login box, then provide your Pervasive Web Site login information. If you forgot your password, or if you don't yet have an account,

Information Provided By **Goldstar Software Inc.**

<http://www.goldstarsoftware.com>

click the appropriate links on the bottom of the login window.

5. When you see the Download box, click on North American Download Mirror (unless you are located closer to Pervasive's server in Europe).

Download

Below are links to your requested download. An email has also been sent to you with this information.

- [North American Download Mirror](#)
- [European Download Mirror](#)

6. If you are running more than a single-user system, you should ALSO download the Client (Win32), as this will need to be installed to each workstation in the network as well. Note that the Client you download should match your APPLICATION, not the OPERATING SYSTEM. You will NOT need the Win64 client unless you are also running a 64-bit Pervasive application (which is still very rare). If you are unsure if your application is 32 or 64, it is probably 32-bit.

If you have any problems with this process, which is solely controlled by Pervasive Software, please contact them directly at 800-BTRIEVE for assistance.

Download the Latest Update Patch

Pervasive PSQLv11 SP3 was released in January 2013, but it will be updated periodically as existing issues are found and fixed. Use your web browser to go to

Information Provided By **Goldstar Software Inc.**

<http://www.goldstarsoftware.com>

www.pervasive.com and click on the link for PSQLv11.

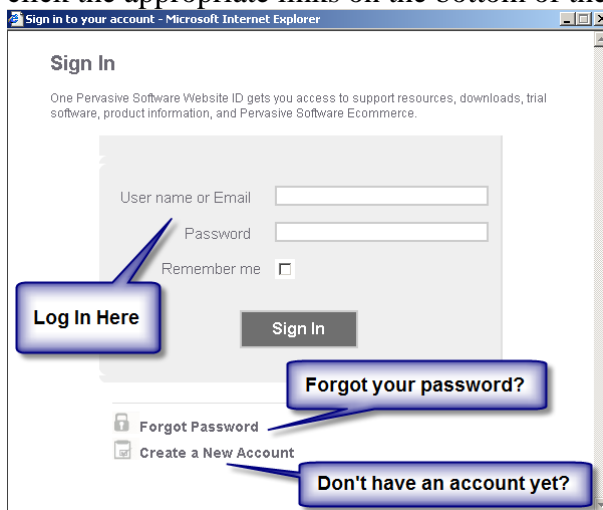

1. In the next page, find the PSQLv11 Updates section.

PSQL v11 Updates - Requires Existing PSQL v11 Install

| Downloads | | | | Version Data | | Documentation |
|------------------------|-------|-------|-------|--|-----------------|-------------------|
| v11 SP3 Update: | | | | PSQL v11 SP3 Update can be installed over v11 or Vx SP3 (11.30). | | |
| Server Update | Win32 | Win64 | Linux | Date | March 2013 | Readme for v11.31 |
| Client Update | Win32 | Win64 | | Update version | v11.30 Update 1 | |
| Workgroup Update | Win32 | | | Build Number | v11.31.11 | |

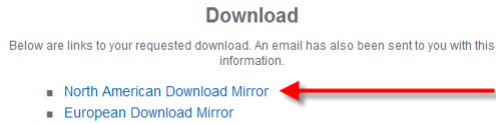

- Now, download the appropriate update. If you have a Workgroup Engine, click to download the Workgroup Update (Win32). If you have a Server Engine, download the Server Update for your platform. If you have a multi-user system you should also download the Client Update (Win32) to update your workstations.
- If you see the Login box, then provide your Pervasive Web Site login information. If you forgot your password, or if you do not yet have an account, click the appropriate links on the bottom of the login window.
